DETAILED ACTION

Response to Amendment

12. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 28** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 28 recites the broad recitation "modulating the

multi-channel sampled signal to generate an output voice signal; and outputting the output voice signal”, and the claim also recites “wherein the multi-channel sampled signal modulating step further comprises: ...converting the multi-channel sampled signal to an output voice signal, wherein the output voice signal is an analog signal; and ...”which is the narrower statement of the range/limitation.

6. **Claims 29-30 and 32** would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter

7. **Claims 33-43** are allowed.

The following is a statement of reasons for the indication of allowable subject matter: see applicant’s response.

Regarding claim 33, the prior art of record in drawn to voice data generators, and time division multiplexing of a plurality of channels associated with respective voice signal, and loudspeakers. However, the prior art of record fails to disclose or fairly suggest, the channel selector coupled to voice data generators, and a voice generator coupled to the channel selector for modulating to the multi-channel signal to provide an voice output, in respect the details of the specification, therein, as of the claimed invention.

Response to Arguments

8. Applicant's remarked the rejection of claims 28-30 and 32 being moot in respect to the amended claim changes of claims 28 and 31 (now cancelled), respectively. However, another rejection has been set forth in respect to the claim language being indefinite. The reasons of indefiniteness has been cited in the Office Action above.
